Houston and Smithers Teachers to Empower Local Students to Save Lives

More than 200 students will be trained in School District No. 54 annually

Where: Houston Secondary School

1771 Hungerford Drive
Houston, BC
V0J 1Z0

When: Thursday, January 28, 2010

8:30 a.m. – 4 p.m., suggested time for media 10 a.m. – 11 a.m.

Houston, BC – On January 28, eight teachers from School District No. 54 Bulkley Valley will be trained to empower students with lifesaving CPR skills and heart health education through the award-winning ACT High School CPR Program.

Teachers from Houston and Smithers Secondary Schools will participate in the ACT High School CPR Teacher Training Workshop at Houston Secondary School. This training will result in more than **200 Grade 10 students** trained annually by their teachers to use this lifesaving skill.

The Advanced Coronary Treatment (ACT) Foundation is working in partnership with the British Columbia Ambulance Service (BCAS) and the paramedics' union, the Ambulance Paramedics of British Columbia - CUPE Local 873, and community partners to bring this program to all BC public secondary schools. BCAS provides ongoing project funding, and when available, paramedics volunteer their time to train secondary school teachers to teach CPR to their students. Once the program is set up in all public secondary schools, approximately 50,000 youth will be trained in CPR each year.

The ACT High School CPR Program is built on a strong community-based model of partnerships and support, whereby ACT finds local partners who donate the mannequins, curriculum materials, and teacher training that schools need to set up the program.

In School District No. 54 Bulkley Valley, ACT is receiving funding from lead community partners AstraZeneca, Pfizer Canada and sanofi-aventis. Thanks to their generous grant of \$6, 430, participating secondary schools in Houston and Smithers will receive 45 CPR mannequins as well as curriculum materials. Secondary school teachers will teach CPR to their students as a regular part of the curriculum, reaching all youth prior to graduation.

“By equipping schools in British Columbia with quality resources and guidance on program set-up, teachers are then able to teach CPR to students as part of the curriculum. This ensures a long-term, self-sustaining program which reaches all youth, including those who do not have easy access or cannot afford to pay for a public course,” said Paul Lévesque, President of Pfizer Canada.

Teacher training is provided by local paramedics who volunteer their time. The January 28 teacher training is being provided by Clare Sketchley, BCAS paramedic and CPR instructor.

Cardiovascular disease accounts for more than one fifth of all deaths in BC. Research indicates citizen CPR response can improve survival rate for victims of out-of-hospital cardiac arrest by almost fourfold. With eight in 10 out-of-hospital cardiac arrests occurring at home, empowering youth with CPR training as part of their high school education will help increase citizen CPR response rates over the long term.

“It’s estimated that only 15 per cent of British Columbians know CPR,” said BCAS Vice-President of Medical Programs Dr. Jim Christenson. “Even with the best technology, medical expertise and timely deployment of first responders, the best chance for someone in cardiac arrest is still to have a bystander perform CPR until paramedics can provide professional CPR and defibrillation.”

“In addition to empowering youth to save lives, the ACT Program has a strong health promotion message,” says Sandra Clarke, Executive Director of the ACT Foundation. “Students learn about risk factors for heart disease and the importance of adopting heart healthy lifestyle behaviors at a young age. They will then bring their health promotion message and lifesaving skills to their present and future families.”

To date, the ACT Foundation has set up the ACT High School CPR Program in more than 1,350 schools nation-wide, empowering more than 1.4 million youth to save lives.

About the ACT Foundation

The ACT Foundation is a national, award-winning charitable organization dedicated to promoting health and empowering Canadians to save lives. ACT is driving a national campaign to establish CPR as a mandatory program in every Canadian high school. ACT raises funds for CPR mannequins for schools and guides schools in program set up. The Foundation and its core partners are winners of Imagine Canada’s “New Spirit of Community Partnership” Award. Core partners are companies in the research-based pharmaceutical industry: AstraZeneca, Bristol-Myers Squibb Canada, Pfizer Canada and sanofi-aventis. They provide ACT’s sustaining funding and are committed to the BC program and ACT’s national goal of promoting health and empowering Canadians to save lives.
